Public Getting Into the Market And Stocks Again Hardening

UNION PACIFIC

Advances Two Points on Strong Bull Movement

INDUSTRIALS ARE STRONGER

Consolidated Gas Jumps Two Points and Steel and Copper Issues Recover Losses.

NEW YORK, Sept. 21.-What hesitation the stock market might have shown this morning in ordinary circumstances was dissipated in the first hour by the continuance of yesterday's unexpected bull movement in Union Pacific. That stock after a slight fractional reaction steadily hardened under large transactions and scored an advance of nearly 2 per cent. It quickly carried in its train, Pennsylvania and New York Cen- Pacific Mail Stmr train, Pennsylvania and New York Cen-trail, both of which advanced 1 per cent. Missouri Pacific also gained a point and the influence of these movements caused fractional improvements to the general railway list, notwithstanding further anxiety over the possibilities of the cold wave in the northwest.

anxiety over the possibilities of the cold wave in the northwest.

Better support also developed in some of the industrial features. United States Steel preferred opened off % per cent, but soon had established a recovery of 1% per cent. Amalgamated Copper was stronger at a fractional gain. There was an advance of nearly 2 per cent in Consolidated Gas. The local tractions were dull, but fairly steady. After the first hour the urgency of the demand for Union Pacific abated somewhat and the speculation as a whole became less active and suffered slight concessions. Government bonds unchanged; other bonds firm with exception of Consolidated Tobacco fours which were weak. The strength of Union Pacific is holding the market, All the big trading is in that stock, and all the clique brokers are buying it, including several who trade for the Standard Oil people and the Harriman interests; and also the Gates following. Many traders who have been buying this stock have been selling in other quarters. The undertone of the general market is, however, much stronger, and a better feeling prevails quite generally over the failure of yesterday's frost scare to receive confirmation. The Western contingent, however, has been a large seller of stocks on balance. London is trading on both sides, but is a buyer to a considerable extent. Commission hause business is fairly good, with more buying than selling.

BIG ADVANCE IN COTTON ON STRONG BULL SUPPORT

NEW YORK, Sept. 21.—Cotton opened firm 6 to 10 points higher. There was considerable excitement, with the bulls a forcing the advance and the shorts in full retreat. Although heavy selling oc-curred on the call, evidently with a view to checking the effects of strong cables from the market at Liverpool, the strong support by the bull operators, together with heavy buying by spot interests, fairly demoralized sellers. Shorts quick-ily became frantic buyers, and after call a sensational advance began. December rose to 10.85 and January to 10.88, repre-senting an advance. full retreat. Although heavy selling oc-

It is believed that a method has been discovered by which the Northern Securities can pay a dividend and that this is the reason for the advance in Union Pacific. There is an uneasy feeling among the bears that some important development is pending in Union Pacific.

The London market for Americans recember to be a trifle lower from 14 to 24 closes will be made from the MAIN OFFICE as follows: discovered by which the Northern Se-curities can pay a dividend and that this

There has been a large short interest in Union Pacific ever since it began to hold back with the rest of the market advancing. On the last 2 or 3 points of the general advance the chronic weakness of Union Pacific was commented upon continually, and it became a favorite short sale. The general market responded but feebly to the Union Pacific demonstration. Even Southern Pacific failed to show as much sympathetic strength as might have been expected.

There is some foundation for the report that a plan may yet be devised whereby it will become feasible to make a dividend distribution to Northern Securities stockholders. Efforts to accomplish this prepress have been complish this purpose have been re-newed, at least, and with some prospec-
